Here comes the train.

Letting the Pigeons out to fly home again as fast as they can.

Special vans for carrying pigeons are now run by railway companies. This picture shows the interior of one of the Midland Company’s pigeon vans.
Arrival and despatch of a ship's cargo.
A School Treat.

An express on the North Eastern Railway.
One of the latest engines on the Western Railway of France.

An Engine on a Ceylon Railway.

The New York Central Electric Motor.

So as to avoid the smoke from engines in New York, city trains are hauled by electric locomotives, (of which the above is an illustration) from a point of about 25 miles outside the New York terminus. These locomotives are very powerful and can develop the enormous energy of some 4,000 horse power.
The Engine's
"Wash and brush up."

Watching for Daddy's train.
Unloading the Mails.
How letters arrive from America.

Showing a Post-bag slung ready to be caught up by the express train. The train catches the bag into the net as it passes at full speed.
How coals are shot into the tender of an Engine.

Men at work on the line.
A Giant crane which can lift a whole truck of coal, weighing 10 to 15 tons.
One of the latest engines of the Caledonian Railway.
